

SAMUEL GEORGE MUVVA

Full Stack Developer

muvvasamuelgeorge@gmail.com | +91 8295059792 | linkedin.com/in/msgeorge78 | github.com/msgeorge7823 | Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Full Stack Developer who builds end-to-end web and mobile applications — from database design to pixel-perfect interfaces. Proficient across the modern JavaScript ecosystem: React 19, NestJS, PostgreSQL, TypeScript, and React Native. Built NexusHub, a production-grade creator economy platform spanning web and mobile, with real-time messaging, payment processing, event-driven architecture, and containerized deployment. Backed by professional experience at Sears IT, structured mentorship, and a drive to ship clean, scalable software. Seeking full-time opportunities to own features across the entire stack and deliver impact from day one.

CORE TECHNICAL COMPETENCIES

Frontend (Web): React 19 (Hooks, Server Components, Suspense), TypeScript 5.x, Vite 6.x, Tailwind CSS 4.x, ShadCN/UI, Zustand 5.x, Redux Toolkit 2.x, TanStack Query v5, React Hook Form, Zod, Recharts, Socket.io-client

Backend: Node.js 22.x, NestJS 11.x, Express.js, TypeORM 0.3.x, PostgreSQL 17.x, JWT, Passport.js, Swagger/OpenAPI, Pino, class-validator, Nodemailer, Handlebars

Payments & Services: Stripe (Payment Intents, Subscriptions, Webhooks), Firebase (Auth, Cloud Functions v2), Twilio (SMS), Nodemailer

Frontend (Mobile): React Native 0.76+, Expo SDK 52, React Navigation 7.x, NativeWind 4.x, Reanimated 3.x, Moti, expo-notifications

Infrastructure & DevOps: Podman (Docker), Docker Compose, NGINX (reverse proxy, SSL, rate limiting), Apache Kafka (KRaft), Redis 7.x (caching, pub/sub), Apache Ignite, MinIO, Socket.io

Testing & Quality: Jest, Supertest, React Testing Library, Unit/Integration/E2E Testing

PROFESSIONAL EXPERIENCE

Technical Associate — Frontend Development

Sears IT and Management, Pune, India | April 2021 – October 2022

- Developed static front-end webpages using Angular, HTML5, and CSS3, ensuring responsive design and cross-browser compatibility
- Collaborated with cross-functional teams on front-end initiatives, participating in code reviews and technical discussions
- Gained exposure to development workflows including Agile methodologies, project tracking (JIRA), and stakeholder communication

Frontend Developer Intern

Dot C Technologies, Hyderabad, India | January 2020 – May 2020

- Learnt manual frontend development using HTML, CSS, Bootstrap, Javascript and Angular following accessibility best practices

FREELANCING, UI CREATION & LEARNING

Photography & Visual Documentation

- Captured professional photography for special occasions including wedding coverage
- Developed understanding of visual composition, lighting, and storytelling through imagery
- Managed client deliverables and quality assurance for photography projects

Design & Print Media

- Created digital designs including posters, invitations, and greeting cards for various occasions
- Produced wedding invitation videos and multimedia content for clients
- Explored typography, layout design, and visual hierarchy principles through practical design work
- Developed proficiency in design composition, color theory, and visual communication

Learnings

- Studied prompt engineering and workflow optimization techniques
- Gained knowledge of modern automation patterns and AI-assisted productivity

PROJECTS

NexusHub — Creator Economy & Collaboration Platform

A full-stack, production-grade platform blending content publishing (Medium), digital marketplace (Gumroad), and real-time community (Discord) into a unified creator economy experience.

- Multi-method auth (email/password, Google/GitHub OAuth, phone OTP) • Rich-text publishing with drafts, tags, search/discovery
- Digital product marketplace — sell courses, templates, ebooks • Premium subscriptions (Free/Pro/Enterprise) via Stripe
- Real-time messaging with DMs, channels, typing indicators • Notification system (in-app, email, SMS)
- Admin dashboard with moderation, analytics
- Stack:** React 19, Vite, TypeScript, Tailwind, ShadCN/UI, Zustand, TanStack Query | NestJS, Node.js, PostgreSQL, MongoDB, TypeORM, Podman (Docker), Kafka, Redis, MinIO, NGINX, Stripe, Firebase, Twilio

PROJECTS (continued)

Social Influencer — AI-Powered Social Media Content Engine

A Windows desktop application that transforms trending news headlines into publish-ready, multi-platform social media carousel posts using AI-powered content generation, topic analysis, and direct publishing.

- Multi-source content pipeline: trending headlines (47 countries), AI-generated content from natural language, manual entry
- AI-powered topic analysis via Google Gemini (conclusions, cause-effect, platform-specific captions) • 8 auto-themed SVG backgrounds
- Built-in slide editor with crop presets, 18 fonts, color picker, live preview • Drag-and-drop slide ordering
- Direct OAuth publishing to Instagram, Facebook Pages, LinkedIn • Structured ZIP + Excel export
- **Stack:** Electron 40.x, React 19, TypeScript 5.9, Vite 7.x, Google Gemini 2.5 Flash, Sharp, @dnd-kit, NewsAPI, Instagram/Facebook/LinkedIn APIs

EDUCATION

B.Tech, Electronics and Communication Engineering

BML Munjal University | Gurugram, Haryana | 2016 – 2020

CERTIFICATIONS

- **Professional Certification - Fullstack (PCFS)**
Ceralume Labs | 2026
- **AI Generalist Accelerator Program**
OutSkill | 2025

ADDITIONAL SKILLS

- UI/UX Skills – Design Principles & Graphic Design
- Cross-functional Collaboration, Agile/Scrum, Clean Code Principles
- Problem-Solving & Debugging, Attention to Detail, Self-Directed Learning
- **Hobbies:** Photography, Content Creation, Outdoor Sports

LANGUAGES

- English (Professional Fluency)
- Telugu (Native)
- Hindi (Intermediate)
